SUMMARY

GenAI Engineer with 5+ years building production AI systems spanning agentic workflows, retrieval systems, model evaluation, fine-tuning, and AI infrastructure across OpenAI, Claude, Gemini, and Llama ecosystems. Delivered enterprise-scale solutions processing 4M+ records at 100K/day throughput, serving high-throughput workloads, and driving organization-wide AI adoption.

SKILLS

LLM Systems: RAG, Multi-Agent Systems, Agent Orchestration, A2A, MCP, Function Calling, Prompt & Context Engineering, Fine-tuning, Model Evaluation, LLM Routing, Guardrails, Observability

Frameworks & Models: LangGraph, LangChain, CrewAI, ADK, Glean, Vertex AI, Claude Code · GPT, Claude, Gemini, Llama

Infrastructure & Data: AWS, GCP, Azure, Kubernetes, Docker, Airflow, Arize, CI/CD · PostgreSQL, Redis, Qdrant, Vector DB

Languages & ML: Python, C++, SQL · TensorFlow, Scikit-Learn, XGBoost, Deep Learning, NLP, Computer Vision

EXPERIENCE

GenAI Engineer

December 2024 - Present

Docusign

Bengaluru, India

- Designed a multi-stage LLM classification pipeline with model routing, confidence scoring, human-review workflows, and offline evaluation to track accuracy, processing 4M+ records at 100K/day throughput.
- Built shared GenAI components including LLM routing with cost and latency optimization, MCP services, agent identity, RAG pipelines, and observability integrations that accelerated development across AI applications.
- Led development and rollout of Glean-based productivity agents, including automated daily action items, adopted by 50%+ of employees.
- Developed a Text-to-SQL pipeline using LangChain and vector databases, achieving 94% query accuracy and reducing reporting turnaround by 80%.
- Architected personalized email generation agents using CrewAI and LangChain, delivering 10K+ tailored emails and increasing click-through rates by 14%.

Software Engineer, LLM

December 2023 - November 2024

Webb.ai

Remote, India

- Architected multi-agent and RAG systems for automated DevOps/SRE troubleshooting in cloud environments, handling 100 parallel requests per second in production.
- Fine-tuned LLMs using LoRA on tool-call datasets, built evaluation pipelines to benchmark function-call accuracy on held-out benchmarks, improving it from 78% to 89%.
- Drove a 60% reduction in DevOps/SRE debugging time and 50% cost savings through LLM-driven root cause analysis and incident resolution workflows.

Software Engineer, Machine Learning

June 2021 - November 2023

Ivy Homes

Bengaluru, India

- Led development of OCR, Entity Extraction, Document Classification, Text Clustering, and Pricing/Valuation models, reducing property valuation error from 15% to 8% MdAPE.
- Built an LLM-powered real estate chatbot that automated 90% of off-hours user queries. Developed data pipelines processing 3M+ records and secured internal dashboards and business data through a self-hosted VPN layer.

Software Development Engineer Intern

May 2020 - July 2020

Amazon

Remote, India

- Built and deployed a lender runbook website for Amazon Pay Later on AWS, reducing partner prep time by 80%, won a 3-day hackathon with 30+ participants and received a full-time offer.

EDUCATION

Bachelor of Technology - Computer Science and Engineering

August 2017 - June 2021

Malaviya National Institute of Technology (MNIT)

Jaipur, India
